Profile

A results-driven professional with a background in Electronics and Telecommunication Engineering and experience in technology, IT support, telecommunications, and SaaS product environments. Skilled in gathering and translating business requirements into product specifications, coordinating with development teams, conducting product testing and UAT, and supporting product implementation and user adoption. Strong technical foundation with knowledge of web technologies, combined with analytical, problem-solving, and stakeholder management skills, with a passion for developing user-focused digital products and driving continuous product improvement.

Professional Experience

05/2026 – Present

Product Specialist

Dar es salaam, Tanzania

Exact Manpower Consulting Limited

- **Product Requirements & Analysis** – Gather and analyze business and customer requirements and translate them into clear product specifications, user stories, and acceptance criteria.
- **Product Development & Collaboration** – Work closely with developers, UI/UX designers, QA, and business teams to coordinate product development and ensure features meet user and business needs.
- **Product Testing & Quality Assurance** – Conduct UAT and functional testing, identify product issues, and coordinate resolution of bugs and enhancements before release.
- **Product Implementation & Customer Support** – Support product implementation, demonstrations, onboarding, training, and ongoing customer support to drive successful product adoption.
- **Product Improvement & Performance** – Collect user feedback, monitor product performance and adoption, conduct market research, and recommend continuous product improvements and new features.
